

Tala Kayali

Website Operations & Product Thinking

tala.kayali.09@gmail.com · Turkey · tala-kayali.myworkss.workers.dev · github.com/reiw9 · linkedin.com/in/tala-kayali

Website operations specialist for a live dental clinic. Alongside that, I'm a 4th-year dental student. I take a website from an idea to a site people can rely on — then keep it that way: UI/UX, SEO, accessibility, performance, and the technical coordination behind it. I work the way clinical training taught me — diagnose before changing anything, verify every fix, and ship only what I'd stand behind.

EXPERIENCE

Website Operations — JC Dental

2026 – Present

jc-dent.com · dental clinic website

- Decide what needs to change, review every result, and make the final call before deployment. When something breaks, it comes to me.
- Reworked the appointment booking flow around where patients were getting stuck, with clearer steps and explicit confirmation.
- Ran SEO and WCAG-aligned accessibility passes across every page, lifting local discoverability and usability at the same time.
- Modeled Sanity CMS schemas so clinic staff update services, bios, and pricing themselves — no developer for routine changes.
- Managed deployment, content, and database infrastructure (Cloudflare, Sanity, Supabase); reviewed auth, access rules, and secret handling.
- Ran performance and cross-device QA, and wrote the documentation so the setup and decisions aren't only in my head.

SELECTED PROJECT

Pelmo Creativity — Commissioned

2026

pelmo-creativity.com

Worked directly with the client from planning through delivery, including multilingual support, CMS integration, deployment, and final handoff.

SKILLS

Web Operations & Infrastructure

Git & GitHub · Cloudflare deployment & DNS · Website auditing · Environment & config management · Incident triage

Product & UX

Product thinking · UI/UX · Responsive design · User-flow & booking-funnel design · Feature prioritization

Technical Planning & Judgment

Scoping & trade-offs · Code review · Debugging & root-cause tracing · Technical documentation

Content Systems

Sanity CMS (schemas & modeling) · Supabase (auth, database) · CMS & editorial workflow · Structured content planning

Website Health

SEO optimization · Accessibility (WCAG-aligned) · QA testing · Performance auditing · Cross-browser & device testing

Languages

English · Turkish · Arabic

EDUCATION

Dental Student — Faculty of Dentistry

4th Year

Turkey

Clinical training in structured diagnosis and precise, protocol-driven work — the same discipline the web work runs on: examine before you treat, work carefully where a mistake carries a cost, and stay calm when a case stops going to plan.
